Summary

Health data professional working across interoperability, clinical data linkage and health data engineering, bridging clinical and technical teams in complex health systems. Applied HL7 FHIR standards within the NHS Genomic Medicine Service at Genomics England, and now aligns perinatal datasets to SNOMED CT across 57 Victorian hospital sites. Strong track record turning data workflows into clear documentation, SOPs and guides.

Skills

Health data and standards:	HL7 FHIR, SNOMED CT, clinical data linkage, data governance, EHR systems
Data and technical:	SQL, Python (pandas, OOP, pytest), AWS, Tableau, Git, bash
Documentation and engagement:	Technical documentation, SOPs, stakeholder engagement, training delivery

Experience

Clinical Data Linkage Manager <i>Murdoch Children's Research Institute (GenV)</i>	Mar 2026 – Present Melbourne, Australia
---	--

- Lead clinical data linkage coordination across the team, overseeing data sharing agreements, honorary appointments, participant matching and extraction across 57 Victorian hospital sites
- Designed and built a semi-automated Python and SQL linkage pipeline that cut the matching process from weeks to hours
- Building a perinatal data dictionary of Victorian reportable datasets, aligned to SNOMED CT

Clinical Bioinformatician <i>Genomics England</i>	Apr 2022 – Jan 2026 London, UK
---	-----------------------------------

- Architected FHIR resource models for genomic variant interpretation data, validated with the NHS England FHIR lead and implemented in Python against AWS HealthLake
- Sole bioinformatician in an Agile squad delivering CIPAPI, a bidirectional REST API and clinical data repository serving the NHS Genomic Medicine Service
- Analysed large-scale clinical and genomic data in Python and SQL, building QA tooling and Tableau dashboards that surfaced operational bottlenecks
- Led development of external-facing user guides, establishing documentation standards and version-controlled workflows with Git, MkDocs and Mike

Junior Research Engineer <i>Barcelona Supercomputing Center</i>	May 2021 – Apr 2022 Barcelona, Spain
---	---

- Developed automated Python pipelines for meta-analysis of RNA-Seq and high-throughput sequencing data in rare disease and cancer research
- Analysed large-scale genomic datasets for collaborative research projects including the EU-funded individualized Pediatric Cure (iPC) project

Education

MSc Bioinformatics Applied to Precision Medicine and Health <i>Escuela Nacional de Sanidad, Instituto de Salud Carlos III</i>	Sep 2020 – Oct 2021 Madrid, Spain
MSEd Science Teaching in Secondary Education <i>Universitat Pompeu Fabra</i>	Sep 2018 – Jun 2019 Barcelona, Spain
BSc Biotechnology <i>Universitat de Girona</i>	Sep 2014 – Jun 2018 Girona, Spain

Certifications

FHIR Implementer: Foundational Health Level Seven International (HL7)	May 2025
SNOMED CT Foundation SNOMED International	Jun 2026
Certified Cloud Practitioner Amazon Web Services (AWS)	Mar 2024
C2 Proficient in English IELTS for UKVI Academic	Mar 2022
